EXAMINER'S AMENDMENT

1. This Examiner's Amendment is responsive to the Amendment filed June 3, 2004. The Examiner acknowledges the amendments to the drawings, to the specification, and to claims 1, 2 4, 6, 10, 12, 19, 21, 23, 27, 28 and 32. Claims 1-38 are pending.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

On page 15, line 2, of the specification, “, and therein generally designated 10,” has been deleted.

In paragraph 2 of the Office Action mailed March 26, 2004, the drawings were objected to because they did not include reference sign “10” mentioned in the description. Applicant's Amendment filed June 3, 2004 was not responsive to this drawing objection. The Examiner has amended the specification to remove the reference to character “10,” as the reference character is not essential to one's understanding of Figure 2 and the probe illustrated therein.

Allowable Subject Matter

4. Claims 1-38 are allowed over the prior art of record.

5. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-20, no prior art of record teach or fairly suggest methods of examining tissue in order to differentiate the examined tissue from other tissue according to the dielectric properties of the examined tissue, as claimed by Applicant, where an electrical pulse is applied to the tissue to be examined via a probe formed with an open cavity at one end of the probe, such that the probe generates an electrical fringe field in examined tissue disposed within the open cavity such that negligible radiation penetrates into other tissues or biological bodies near the examined tissue.

Regarding claims 21-38, no prior art of record teach or fairly suggest a system for examining tissue in order to differentiate the examined tissue from other tissue according to the dielectric properties of the examined tissue, as claimed by Applicant, including a data processor, a detector, a pulse generator, and a transmission line in communication with a probe having an inner conductor insulated from and enclosed by an outer conductor that extends axially past the inner conductor to define an open cavity at one end of the probe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
